

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph on Page 5, lines 4-11 with the following paragraph rewritten in amendment format:

As can be seen from Figure 1 the air-bag comprises an inflatable region 2 of generally oval form, and, connected to one side of the inflatable region 2, an integral chamber 3 to receive a gas generator. The gas generator to be received within the housing 3 may be of generally cylindrical form. The housing 3 is provided with[[a]] an access aperture 4 provided at one end thereof through which the gas generator may be mounted in position. The gas generator itself may seal the aperture 4, or the aperture 4 may be sealed in some other way.
